Subject Index

A_2 human blood group
- IgG anti-B antibodies in, causing HDN 363

ABH receptors in a 'Bombay' blood 338

ABO antibodies
- Anti – A_2 m (1) 372
- Anti-A from *Euhadra callizoma amaliae* 347
- Anti-A, Anti-B and ^{125}I-labelled blood group glycoproteins 115

ABO grouping
- reliability of groupamatic system 141

ABO human blood group antigens
- partial purification by sodium deoxycholate fractionation 504
- incidence of weaker variants in Bombay 524

Ag system
- Ag(i) 550

Agarose gel electrophoresis
- for red cell acid phosphatase phenotyping 556

Albumin
- in haemagglutination reactions 156

Antibiotics, oral
- and anti-T agglutinin 268

Anti-D immunoglobulin
- yield increased by processing Cohn's fraction III 207

Anti-factor II (Prothrombin) antiserum
- preparation of 214

Anti-HAA
- separation of human HAA for production of in rabbits 227

Anti-immunoglobulin antibodies in immunodeficiencies and γ-globulin reactions 294

Anti-I (A + B) autoantibody 515

Anti-IP antibody 442

Anti-Pr cold agglutinins
- demonstration of 429

Antiserum
- Anti-factor II, preparation 214
- Anti-HAA: separation of HAA for production of 227

Anti-T agglutinin
- influence of oral antibiotics 268

Anti-Wr^a (Wright)
- causing HDN 478

Anti-Yt^a
- *in vivo* destruction of Yt(a+) red cells 171

Autoantibodies
- Anti-I(A + B) 515

Automated determination
- of IgG, IgM rhesus antibody fractions 287

BFA activity
- in haemodialysis patients 1

Blood donors
- plasma fibrinogen levels in 176

Blood group gene products
- in plasma, and genotype of chimeric twins 395

Blood group glycoproteins
- reactions with IgG and IgM anti-A, anti-B 115

Blood storage
- and biochemical changes 403

Blood transfusions
- and BFA activity 1

'Bombay' blood
- ABH receptors and red cell survival in 338
- incidence of Oh phenotype in Bombay 524

C3 Polymorphism Reference Laboratory
- Annual Report, 1973/1974 464

Cell electrophoresis
- for detection of platelet antibodies 489

Chimeric twins
– genotype revealed by blood group substances in plasma 395
Cirrhotic patients
– oral antibiotics and anti-T agglutinin 268
Cohn fractionation
– hepatitis B antibody from plasma products separated by 302
– fraction III processing increases anti-D immunoglobulin yield 207
Cold agglutinins
– anti-Pr 429
Complement-fixing antibodies
– in serum at delivery 322
Contrast fluorescence test 13
CPD blood
– for leukocyte-poor red cell concentrates 21
Cross-reactivity 254
– between A, B, I antigens: an antibody recognising 515
Cytogenetic investigation
– of Rh_{null} phenotype 190
Cytotoxicity assays
– serology for 13

D^u-positive mother
– HDN due to anti-D antibodies 92
Disseminated intravascular coagulation
– effects of dextrans, gelatins, and plasma protein solutions 411
DTT test
– to differentiate IgG, IgM antibodies 480

Elution
– HL-A antibodies from platelets 310
Electrophoresis
– agarose gel, for red cell acid phosphatase phenotyping 556
– cell, for detection of platelet antibodies 489
Enzymes
– in haemagglutination reactions 156
Erythrocyte glycoproteins
– cryptic A-like receptor sites 29
Erythrocyte membranes
– sodium deoxycholate fractionation 504
Erythrocyte phenotypes
– analysis of weak B_{60}, 243
Erythrocyte proteins
– cryptic A-like receptor sites in 29
Erythrocytes
– unusual expression of Ii antigens 57
Euhadra callizoma amaliae
– anti-A agglutinin from 347

Fc-like fragment
– release of on reduction of water-soluble IgG myeloma proteins 273

GBG
– linkage with HL-A 382
γ-globulin
– influence of anti-immunoglobulin antibodies on intolerance reactions to 294
Granulocytes
– histocompatible infusion and leucocyte count 186
Groupamatic system
– reliability in ABO grouping 141

HAA antigen
– separation from human plasma 227
HBs antigen
– geographical distribution of subtypes 533
Haemagglutination reactions
– role of enzymes and albumin in 156
Haemolytic disease of the newborn
– anti-ce(f) causing, 473
– anti-D in D^u-positive mother causing 92
– anti-Wr^a(Wright) causing 478
– IgG anti-B in A_2 mother causing 363
Haemostasis
– changes in rabbits during dextran perfusion 411
Hepatitis B antigen
– reversed haemagglutination test 97
Hepatitis B antibody
– recovery from Cohn-fractioned plasma products 302

HL-A antibodies
– elution of from platelets 310
HL-A system
– an HL-A27 recombinant 265
– association with red cell antigens 124
– linkage with GBG 382
– paternity exclusion 379
– Sa l, a new specificity in Japanese 134
Human blood
– optimal use of 193, 207
Human plasma
– separation of HAA from 227
Human plasma products
– recovery of hepatitis B antibody from Cohn-fractioned 302

I blood group system
– interaction with P system 442
IgA deficiency
– selective, in Rh-Negative women 87
IgG anti-B
– in A_2 mother, and ABO haemolytic disease 363
IgG antibodies to vaccinia
– detection by immunoelectroendosmophoresis 459
IgG, IgM antibodies
– anti-A and anti-B, reactions with ^{125}I-labelled glycoproteins 115
– DTT test for differentiating 480
IgG, IgM rhesus antibodies
– automated determination 287
Ii antigens
– unusual expression 57
Immunodeficiencies
– anti-immunoglobulin antibodies and γ-globulin reactions 294
Immunoelectroendosmophoresis
– detection of vaccinia antibodies 459
Immunoglobulin, anti-D
– yield increased by processing Cohn's fraction III 207
Immunoglobulin isolation
– quantitative analysis 193
Infusion
– of histocompatible granulocytes 186
Intolerance reactions
– to γ-globulin: influence of anti-immunoglobulin antibodies 294

Japanese population, Sa 1 in 134

Kell blood group system
– Wk^a: a new antigen 81

L antigen
– in saliva, detected by *Lotus tetragonolobus* lectin 447
Leucocytes
– BFA activity in haemodialysis patients 1
– increased elevation after granulocyte infusion 186
– polymorphism of PGM_3 in 376
Linkage
– HL-A and GBG 382
Lotus tetragonolobus
– lectin detecting the L saliva antigen 447
Lutheran blood group system
– another antibody (anti-Lu 11) 52
Lu (a−b−)
– P_1 inheritance apparently upset 369
Lu 11 antigen
– antibody defining 52
Lymphocytoxic antibodies
– in serum at delivery 322

M_1 antigen
– antibody reacting with 43
MN patient
– Anti-M_1 in 43
Methemoglobin reduction
– decreased in stored blood 403
MN patient
– anti-M_1 in serum 43
Molluscs, extracts from
– O(H)-like activity and antibodies 67
Myeloma
– Fc-like fragment released from IgG proteins 273

O(H) blood group
– *Pomacea paludosa, urceus* 67

Oxygen affinity
– increased in stored blood 403

P blood group system
– interaction with I system 442
– P_1 inheritance apparently upset in Lu(a−b−) 369
P_1 inheritance
– apparently upset in Lu(a−b−) syndrome 369
Paternity exclusion
– by HL-A system 379
Peripheral leukocyte count
– after infusion of histocompatible granulocytes 186
Phosphoglucomutase in leucocytes
– gene frequencies and family studies 376
Plasma fibrinogen
– levels in regular blood donors 176
Platelet antibodies
– detection by cell electrophoresis 489
Platelets
– elution of HL-A specific antibodies from 310
Polymorphism
– of PGM_3 in leucocytes 376
Pomacea paludosa, urceus
– agglutinins and O(H)-like activities 67
Positive antiglobulin reactions
– with thawed red cells 385
Proteins, water-soluble IgG
– release of Fc-like fragment on reduction of 273
Prothrombin, human
– purification 214

Receptors, ABH
– in a 'Bombay' blood 338
Receptor sites
– cryptic A-like in erythrocyte glycoproteins 29
Recombinant
– another HL-A27 265
Red cell acid phosphatase
– phenotyping by agarose gel electrophoresis 556
Red cell antigens
– association with HL-A 124
Red cell concentrates
– leukocyte-poor, from CDP blood 21
Red cells
– survival in a 'Bombay' blood 338
– thawed, positive antiglobulin reactions with 385
Reference Laboratory for C3 Polymorphism
– Annual Report 1973/1974 464
Renal allograft recipients
– MLC blocking factor in 1
Reversed haemagglutination test
– for hepatitis B antigen 97
Rhesus antibodies
– Anti-ce(f) causing HDN 473
– Anti-D in D^u-positive mother 92
– Anti-D, use G Ferritin-labelled 156
– automated determination of IgG, IgM fractions 287
Rh mosaicism
– two new cases 232
Rh negative women
– selective IgA deficiency 87
Rh_{null} phenotype
– cytogenetic investigation 190

Sa 1
– a possible new HL-A specificity 134
Saliva antigen, human
– detected by *Lotus tetragonolubus* lectin 447
Scianna blood group system 261
Serology
– for automated cytotoxicity assays 13
Sodium deoxycholate fractionation
– for partial purification of ABO antigens 504
Stored blood
– biochemical changes 403
– proposed nature of 29

Tn-antigen
Twins, chimeric
– genotype revealed by plasma 395

Uraemic patients
– BFA in, after blood transfusions 1

Vaccinia antibodies
– detection by immunoelectroendosmophoresis 459
Variants
– weaker A and B, in Bombay 524

Water-insoluble IgG myeloma proteins
– release of Fc-like fragment on reduction of 273
Weak B_{80} erythrocytes
– quantitative, kinetic and thermodynamic analysis 243
Wk^a (Weeks)
– a new antigen 81

Yt(a+) red cells
– anti-Yt^a and rapid *in vivo* destruction 171
